Zi Yang

Full-stack Engineer
yz186337@gmail.com · yzy98 · zyang.space · ziyang

Summary

Full-stack engineer with 5 years of web development experience, specializing in TypeScript, React, Next.js, Node.js, and PostgreSQL. Owns SaaS products end to end, from frontend architecture and API design to multi-tenant data models, billing, background jobs, AI integrations, and deployment.

Experience

Independent · Full-stack Engineer
JAN 2024 - PRESENT

- Built and shipped SaaS applications and browser extensions, owning delivery from React interfaces and API design to PostgreSQL data models and cloud deployment
- Implemented multi-tenant access, authentication, subscription billing, and background processing across full-stack TypeScript applications
- Developed typed SDKs, embeddable widgets, and third-party integrations to connect standalone products with external applications

Ecovacs · Software Engineer
JAN 2022 - DEC 2023

- Built and shipped real-time 3D floor maps for three robot vacuum models with Vue and Three.js, supporting no-go zones and repeat cleaning
- Cut time to first map render by 3 seconds by chunking high-volume positional data and progressively rendering the floor plan
- Led the Vue 2.7 and Composition API migration across two teams and eight engineers

StubHub · Frontend Engineer Intern
MAY 2021 - DEC 2021

- Built reusable React components for production user flows and resolved UI defects through debugging and refactoring
- Wrote Jest unit tests achieving 95%+ test coverage across selected frontend features

Projects

Geho
MAY 2026 - PRESENT

Self-hosted, multi-tenant AI customer support platform

- Built Geho end to end with React, Hono, and PostgreSQL, delivering a management dashboard, backend API, background worker, and embeddable chat interface
- Improved retrieval hit rate by 15 percentage points over vector-only search by implementing hybrid semantic and full-text retrieval, with source citations and adapters for LLM and embedding providers
- Developed workspace isolation, chatbot configuration, a typed API client and a React widget for integration into external websites

YouTube Comments Chat
SEP 2024 - MAR 2025

Chrome extension for YouTube comment and live-chat overlays with AI translation

- Published a Chrome extension with 30+ users, supporting customizable comment and live-chat overlays, a multilingual interface, and AI-powered translation
- Built the extension with Plasmo and React and synchronized authentication with a Next.js dashboard using Clerk
- Integrated Paddle subscriptions, AI usage tracking, and premium feature gating to support paid functionality

Next.js SaaS Starter
DEC 2024 - APR 2025

Open-source SaaS starter with authentication and Paddle billing

- Built an open-source Next.js SaaS starter with Better Auth, PostgreSQL, Drizzle ORM, and Paddle subscription billing, earning 10 GitHub stars
- Implemented checkout flows, webhook-driven subscription records, type-safe tRPC APIs, Redis rate limiting, and transactional email

Skills

Frontend	TypeScript, React, Next.js, Vite, Vue, TanStack Query, TanStack Router, Tailwind CSS, Three.js
Backend & Data	Node.js, Hono, REST APIs, GraphQL, tRPC, PostgreSQL, Drizzle, Prisma, Redis
AI	RAG, Vercel AI SDK, embeddings, LLM integrations
Testing & DevOps	Vitest, Jest, monorepos, Docker, Cloudflare Workers, GitHub Actions

Education

The University of Queensland
JUL 2019 - DEC 2021

Master of Information Technology

Brisbane, Australia

Soochow University
SEP 2013 - JUN 2017

Bachelor of Science

Suzhou, China
